

VISHWAS GURAV

DATA ANALYST | PYTHON DATA ANALYSIS & VISUALIZATION

vishwasforjobhunt@gmail.com | linkedin.com/in/vishwas-gurav | github.com/VishwasGurao | <https://vishwasgurao.in>

PROFESSIONAL SUMMARY

Results-driven Data Analyst with practical experience in Python-based data analysis, exploratory data analysis (EDA), data cleaning, and data visualisation using Jupyter Notebook and analytical libraries. Skilled in transforming structured datasets into meaningful insights through trend analysis, statistical evaluation, and real-world analytical projects. Proficient in identifying patterns, generating reports, and presenting data-driven findings with strong problem-solving, documentation, and analytical communication abilities.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn)

Data Visualisation: Matplotlib, Seaborn, Excel Charts, Power BI (Dashboard Development, Data Visualisation) Tableau (Basic Dashboarding)

Data Management: Data Cleaning, Validation, Accuracy Checks

Reporting & Insights: Analytical Reporting, Dataset Interpretation, Insight Presentation

Tools & Platforms: Jupyter Notebook, VS Code, GitHub, Excel (Data Cleaning, Charts, Reporting), SQL (Basic Queries, Joins, Data Extraction)

Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Communication, Team Collaboration

PROFESSIONAL EXPERIENCE

Data Science Intern — Unified Mentor Private Limited | Dec 2025 – Mar 2026

- Conducted exploratory data analysis (EDA) on structured datasets using Python, Pandas, NumPy, and Jupyter Notebook to identify trends and meaningful business insights.
- Performed data cleaning, preprocessing, and validation techniques to improve dataset consistency, quality, and analytical accuracy.
- Developed data visualisations and analytical reports using Matplotlib and Seaborn to support insight presentation and reporting workflows.
- Processed and interpreted datasets through structured analytical approaches, enabling effective trend analysis and data-driven observations.
- Collaborated on project-based analytical tasks involving data manipulation, reporting, and insight generation using Python-based tools and workflows.

PROJECTS

Cyber Crime Intelligence Analysis — Kolhapur District Police *Python · Pandas · Excel · Geospatial Analysis · Data Visualisation*

- Conducted analytical examination of 20,000+ cybercrime complaint records (2019–2025) using Python and Pandas to identify reporting trends, regional crime patterns, and operational observations.
- Performed trend analysis, hotspot mapping, and complaint resolution assessment through structured data interpretation and statistical evaluation techniques.
- Executed geospatial analysis across 75+ police divisions to visualise cybercrime distribution patterns and station-level analytical observations.
- Prepared structured analytical reports, statistical summaries, and visual representations to support cybercrime monitoring and data-driven operational review processes.

Supply Chain Management Analysis

Python · Excel · Data Visualisation

- Conducted analytical assessment of supply chain datasets using Python to examine operational trends, inventory patterns, and logistics-related observations.
- Prepared structured visual reports and analytical summaries to support interpretation of supply chain performance and workflow-related patterns.

IBM HR Analytics – Employee Attrition Analysis

Python · Exploratory Data Analysis · Data Visualisation

- Conducted exploratory analysis on 1,470+ employee records using Python to identify workforce attrition patterns, retention-related factors, and employee behavioural trends.
- Generated structured analytical observations and visual reports through data interpretation and exploratory analysis techniques.

Twitter Financial News Sentiment Analysis

Python · Textual Data Analysis · Data Interpretation

- Conducted analytical evaluation of financial news and text-based datasets to identify sentiment patterns and interpret textual behavioural trends.
- Organised and interpreted unstructured textual data through Python-based analytical techniques and structured data examination workflows.

Uber Trip Demand Analysis

Python · Statistical Analysis · Data Visualisation

- Conducted analytical assessment of 4M+ Uber trip records to identify demand fluctuations, peak usage behaviour, and transportation-related operational patterns.
- Prepared statistical observations and visual analytical summaries through Python-based data interpretation and exploratory analysis techniques.

EDUCATION

Master of Computer Applications (MCA) – Data Science

2024 – 2026

Shivaji University, Kolhapur, Maharashtra

CERTIFICATIONS

- Deloitte Australia – Data Analytics Job Simulation (Forage) · 2025
- Data Science – Cisco · 2025
- Cybersecurity Analyst – Tata Group Job Simulation · 2025

ACADEMIC & TECHNICAL ENGAGEMENTS

- Participated in the Avishkar Research Competition through analytical and technical project presentations focused on data-oriented problem analysis.
- Developed Python-based analytical and web-oriented projects as part of practical learning, technical exploration, and self-driven skill development.
- Prepared structured project documentation, analytical summaries, and technical presentations using organised reporting methodologies.
- Maintained technical learning workflows, project repositories, and development practices through GitHub-based project management environments.
- Developed and deployed a fully responsive personal portfolio website showcasing analytics projects, certifications, dashboards, and technical skills using modern web technologies and GitHub-based hosting.
- Implemented SEO optimisation, custom domain integration, sitemap configuration, responsive UI enhancements, and live deployment workflows to strengthen professional online visibility and technical branding.

PERSONAL PROFILE

Date of Birth:	23 November 2002	Languages Known:	English, Marathi, Hindi
Current Location :	Kalburgi, Karnataka	Willing to Relocate :	Yes
Rotational Shifts :	Comfortable	Notice Period :	Immediate Joiner
