

VISHWAS GURAV

Data Analyst | Data Science & Business Intelligence | Python · SQL · Power BI · Tableau · Machine Learning

vishwasforjobhunt@gmail.com | linkedin.com/in/vishwas-gurav | github.com/VishwasGurao | Kolhapur, India

PROFESSIONAL SUMMARY

Data Analyst with Practical experience in enterprise analytics, dashboard development, and business intelligence. Proficient in Python, SQL, Power BI, and Tableau with strong knowledge of predictive modeling and geospatial analytics. Proven ability to synthesize complex datasets into strategic insights that drive informed decision-making and operational excellence.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL

Machine Learning: Regression, Classification, Clustering, EDA, Feature Engineering, Model Optimisation (Scikit-learn)

Data Visualisation: Power BI, Tableau, Matplotlib, Seaborn, Excel Charts

Data Management: Data Cleaning, Validation, Quality Assurance, Pipeline Support, Accuracy Checks

Reporting & Insights: KPI Dashboard Development, Stakeholder Reporting, Business Insight Generation

Tools & Platforms: Jupyter Notebook, VS Code, GitHub, Excel (Advanced)

Soft Skills: Cross-functional Collaboration, Problem Solving, Attention to Detail, Communication

PROFESSIONAL EXPERIENCE

Data Analyst Intern — Unified Mentor Private Limited

Dec 2025 – Mar 2026

- Analysed 50,000+ records from structured and unstructured sources using Python and SQL to uncover trends and deliver actionable business insights to stakeholders.
- Built and maintained interactive Power BI and Tableau dashboards tracking 10+ KPIs, cutting manual reporting effort by ~35%.
- Developed predictive regression and classification models using Scikit-learn; optimised model performance through feature engineering and hyperparameter tuning.
- Implemented data cleaning and validation pipelines maintaining 98%+ data accuracy across all analytical deliverables.
- Collaborated with cross-functional teams to gather requirements and translate business problems into structured data solutions.
- Communicated findings through clear visualisations and presentations tailored to both technical and non-technical audiences.
- Mentored peers on Python, SQL, and Power BI best practices, improving overall team analytics capability.

PROJECTS

Cyber Crime Intelligence Analysis — Kolhapur District Police *Python · Pandas · Excel · Geospatial Analysis · Data Visualisation*

- Engineered a data-driven cybercrime intelligence and analytics solution processing 20,000+ cybercrime complaint records (2019–2025); performed trend analysis, hotspot mapping, FIR vs complaint evaluation, and resolution-rate analysis to surface actionable law enforcement insights.
- Developed executive-level dashboards and intelligence-oriented analytical reports aligned with cybercrime monitoring and operational reporting workflows used by district-level cybercrime authorities.
- Conducted geospatial analysis identifying crime hotspots across 75+ divisions; visualised station-level performance metrics and crime patterns enabling data-driven resource allocation and operational decision-making.
- Automated report generation workflows transforming raw complaint data into structured policy insights and statistical narratives suitable for executive briefings and inter-agency intelligence reporting — demonstrating end-to-end intelligence reporting and analytical workflow capabilities.

Supply Chain Management Dashboard

Python · SQL · Power BI

- Designed an end-to-end supply chain KPI dashboard using Python, SQL, and Power BI to monitor operational performance, identify bottlenecks, and streamline reporting workflows, reducing manual reporting effort by 35%.

IBM HR Analytics – Employee Attrition Analysis

Python · EDA · ML Classification

- Performed exploratory data analysis and predictive attrition modeling on 1,470+ employee records using Python and Scikit-learn; identified key workforce retention factors and generated data-driven HR recommendations.

Laptop Price Analysis

Python · Regression · Scikit-learn

- Developed a regression-based machine learning model to predict laptop pricing across 1,200+ configurations using feature engineering, preprocessing, and model optimisation techniques.

Twitter Financial News Sentiment Analysis

Python · NLP · Unstructured Data

- Built an NLP-based sentiment analysis pipeline to classify financial news and social media text, enabling structured interpretation of unstructured textual datasets.

Uber Trip Demand Analysis

Python · Statistical Analysis · Visualisation

- Processed and analysed 4M+ Uber trip records using statistical analysis and data visualisation techniques to uncover demand patterns, peak usage trends, and operational insights.

EDUCATION

Master of Computer Applications (MCA) – Data Science

2024 – 2026 (Ongoing)

Shivaji University, Kolhapur, Maharashtra

Bachelor of Computer Science

Shree Chatrapati Shivaji College, Omerga

CERTIFICATIONS

- Deloitte Australia – Data Analytics Job Simulation (Forage) · 2025
- Data Science – Cisco · 2025
- Cybersecurity Analyst – Tata Group Job Simulation · 2025

ACADEMIC & TECHNICAL ENGAGEMENTS

- Participated in the Avishkar Research Competition through analytical and technical project presentations focused on data-oriented problem analysis.
- Developed Python-based analytical and web-oriented projects as part of practical learning, technical exploration, and self-driven skill development.
- Prepared structured project documentation, analytical summaries, and technical presentations using organised reporting methodologies.
- Maintained technical learning workflows, project repositories, and development practices through GitHub-based project management environments.

PERSONAL PROFILE

Date of Birth:	23 November 2002	Languages Known:	English, Marathi, Hindi
Current Location :	Kalburgi, Karnataka	Willing to Relocate :	Yes
Rotational Shifts :	Comfortable	Notice Period :	Immediate Joiner
